

NINA VIDMAR

BLOOM DE GEMME

PRODUCT CARE

Every piece of Nina Vidmar Bloom de Gemme jewellery is made by old goldsmith's techniques with great care using only precious metals, natural gemstones and diamonds. Nina Vidmar jewellery is precious and delicate, made with utmost attention to details to meet highest quality standards. Nina Vidmar jewellery is designed to last for many years to come, however all precious jewellery will naturally tarnish with wear over time and special care of the product is recommended. To preserve the brilliance of the metal and gemstones we recommend to handle your jewellery with great care. By taking these precautions of use and maintenance you will be able to keep your jewellery in perfect conditions for a long time.

USE AND MAINTENANCE

To preserve the brilliance and beauty of the materials we recommend you take these precautions of use and maintenance:

- It is recommended that the jewellery should be the last thing to put on when getting dressed and the first thing to take off when undressing.
- Avoid contact with any chemicals, make-up, body care products, hairspray and perfumes.
- Always remove jewellery before washing your hands with soap or hot water.
- Avoid impact against other hard objects. This can easily cause scratches, loss of stones and other damages to the metal.
- Avoid wearing during the sports activities, showering or swimming in sea or swimming pools, as chlorine can cause damage to the metal and stones, especially emeralds, opals and pearls.
- Avoid wearing during gardening or cleaning as the harsh chemicals can cause abrasions and reduce the lustre of the metal.
- Keep away from humidity and extreme temperatures, since most genuine gemstones especially pearls are quite delicate.
- The best way to store your jewellery is the original box or soft pouch that you received with your item.

CLEANING

All precious jewellery will age and tarnish with age. To keep your jewellery in best condition regular cleaning is advised.

- For cleaning use only lukewarm water and detergent free soap. Gently dry out with soft cloth and leave to air dry thoroughly. No paper towels or tissues are advised as they can cause scratching.
- Since pearls, emeralds and opals are very porous stones for cleaning should be used only dry soft cloth. No water or any soaps are advised.
- For polishing use only soft cloth. Do not use any abrasive cleaners or chemicals as it may damage the metal and gemstones.
- We recommend having your jewellery professionally cleaned every few months.
